

Ore Minerals Assemblage and Geochemical Characteristics of Gold-Telluride-Sulfide Mineralization in the Bantarhuni Vein of Arinem Deposit, West Java, Indonesia

Euis T. Yuningsih^{1,2}, Hiroharu Matsueda³

¹ Faculty of Geology, Padjadjaran University, Indonesia

² Graduate School of Science, Hokkaido University, Japan

³ The Hokkaido University Museum, Hokkaido University, Japan

Outlines

Introduction

Geology of Arinem Area

Characteristics of Bantarhuni vein

Conclusions

Host rock and alteration

Mineralogy of ore and gangue

Fluid inclusions

Geochemistry of ore and host rock

Stable isotopes

Formation environment of ore deposition
