## International Journal of English Linguistics

*International Journal of English Linguistics* (IJEL) is an international, double-blind peer-reviewed, open-access journal published by the Canadian Center of Science and Education. The journal focuses on the following topics: English language, applied English linguistics, theoretical English linguistics, sociolinguistics, psycholinguistics, comparative linguistics, computational linguistics, and discourse analysis. It provides an academic platform for professionals and researchers to contribute innovative work in the field. IJEL carries original and full-length articles that reflect the latest research and developments in both theoretical and practical aspects of English Linguistics.

The journal is published in both print and online versions. The online version is free access and download.

e-Version First is a feature offered through our journal platform. It allows PDF version of manuscripts that have been peer reviewed and accepted, to be hosted online prior to their inclusion in a final printed journal. Readers can freely access or cite the article.

We aim to publish accepted manuscripts in e-Version First in two week's time after the final draft completed.

---

---

### Paper Selection and Publication Process

- a). Upon receipt of paper submission, the Editor sends an E-mail of confirmation to the corresponding author within 1-3 working days. If you fail to receive this confirmation, your submission/e-mail may be missed. Please contact the Editor in time for that.
- b). Peer review. We use **double-blind** system for peer-review; the reviewers' identities remain anonymous to authors. The paper will be peer-reviewed by three experts; one is an editorial staff and the other two are external reviewers. The review process may take about 2 weeks.
- c). Notification of the result of review by E-mail.
- d). The authors revise paper and **pay** publication fee (300 USD).
- e). After publication, the corresponding author will receive **two copies of printed journals**, free of charge.
- f). **E-journal** in PDF is available on the journal's webpage, free of charge for download.

#### NOTE:

The publisher and journal have a policy of "Zero Tolerance on the Plagiarism". We check the plagiarism issue through two methods: reviewer check and plagiarism prevention tool ([ithenticate.com](http://ithenticate.com)). All submissions will be checked by iThenticate before being sent to reviewers.

## Announcements

### International Journal of English Linguistics has been included in Thomson Reuters Web of Science, Emerging Sources Citation Index

We are pleased to announce that International Journal of English Linguistics has been included in Thomson Reuters Web of Science, Emerging Sources Citation Index (ESCI). ESCI is a new edition of Web of Science and will extend the universe of publications in Web of Science to include high-quality, peer-reviewed publications of regional importance and in emerging scientific fields. For details about ESCI, please visit [http://wokinfo.com/products\\_tools/multidisciplinary/esci/](http://wokinfo.com/products_tools/multidisciplinary/esci/)

*Posted: 2015-11-20*

### Call for Papers and Recruit for Reviewers

Submission of papers for publications consideration are welcome at all times. You may [submit](#) your manuscripts online or send your manuscripts to [ijel@ccsenet.org](mailto:ijel@ccsenet.org)

We recruit reviewers at: <http://recruitment.ccsenet.org>

If you have any questions, please feel free to contact the editor at: [ijel@ccsenet.org](mailto:ijel@ccsenet.org)

*Posted: 2012-05-17*

## Abstract

The paper titled Attitudinal Epithets in a Children Science Book: a Functional Grammar Analysis analyzes Attitudinal Epithets occurrences in a children's book that intends to explain some scientific phenomena on 'bugs'. Since Attitudinal Epithets are used by speakers or writers in making personal or subjective comments over a phenomenon, they do not normally occur in writings with scientific genre. This paper reveals one of the children's science books used as supplementary resources for Science and English lessons in one of the Private Primary Schools in Bandung city, Indonesia. The analysis is conducted by means of descriptive qualitative methods. The findings provide analytical description over the Attitudinal Epithet's lexical variants that occur in the data; the intensification of Attitudinal Epithets; the scientific, cultural, or other facts in the text preceding or following the Attitudinal Epithets, or outside the text (contextually) to which the speaker directs his personal comment; and the semantic interpretation (including the polarity – negative or positive) towards the Attitudinal Epithets.

**Keywords:** functional grammar, children science book, attitudinal epithet

## 1. Literature Review

### 1.1 Functional Grammar

This paper describes attitudinal epithets in scientific genre, which are analyzed through Functional Grammar (FG) approaches developed by M.A.K Halliday. Halliday's approach to grammar is a semantically driven, which, while not denying that certain principles of syntax do apply, seeks to consider and identify the role of various linguistic items in any text in terms of their function in building meaning (Halliday, 1989, p. xi; Halliday & Matthiessen, 2004, p. 3). Clauses, phrases, and groups may be viewed in the light of three different metafunctions, the Ideational, Textual, or Interpersonal Metafunction. The Textual metafunction interprets meaning based on whether a linguistic unit is the point of departure, the take-off ground of what the speaker is going to say, or not. While the Interpersonal metafunction tends to seek a language function in enacting a social relationship, whether to inform, offer, request, decline, accept, and the like. The ideational metafunction interprets meaning experientially, from the viewpoint of people's experience of their world. This view of a language brings this paper to the analysis of one of the Experiential Functions of the pre-modifiers in Nominal Groups, the Attitudinal Epithet.

Interpreting meaning of an epithet through anaphoric reference was analyzed by Beller (in <http://www.researchgate.net/publication/43648019>). By anaphora, paraphrasing attitudinal epithets appropriately depends on the semantic elements or facts in the preceding text(s). In addition to anaphoric reference, this paper, *Attitudinal Epithets in Children Science Book*, provides other references (the following text or cataphora, and the context surrounding the attitudinal epithets) to interpret the speaker's comments through his choice of attitudinal epithets.

Another linguist investigating attitudinal epithets is J. L. Lemke (<http://academic.brooklyn.cuny.edu/>). He investigated Attitudinal Epithets as a Head. He classifies the evaluation of Attitudinal Epithets into those indicating the speaker's desirability, warrantability, normativity, usualness, importance, comprehensibility, and humor. This paper provides different classifications. It classifies the Attitudinal Epithets into their lexical variants, intensification strategies, polarity (positive or negative), and aspects to comment on.
